DORMER DIN ANSI NEW! SHARK LINE

Blue Shark Spiral Pointed Taps For Stainless Steel

Super-B (TiAIN + WC/C) coating with additional edge treatment.

Manufactured from a unique powder metallurgy tool steel different from any other HSS-E-PM. This provides an unbeatable combination of toughness and edge strength, allowing the taps to perform at higher cutting temperatures while offering excellent performance and longer tool life.

FEATURES:

- Color ring coding helps identify suitability for specific materials and enables quick and easy tool selection.
- Advanced Geometry & Chamfer - Thread geometry with optimized form generates low torque, excellent threads at both high and low speeds, and superior surface finish. Significant reduction in axial forces and torque compared to conventional taps ensuring problem-free threading of blind and through holes in the selected material.
- Standard ANSI shank and square with DIN overall length, for extra reach and compatibility with Inch Standard Tap Holding.

R&N Penta Style Spiral Point Taps

With Blue Diamond Surface Treatment

HIGH SPEED STEEL
PLUG STYLE
LIST NO. 102CPR

GROUND THREAD
THREAD LIMITS H-3
RIGHT HAND

Work well on medium and high carbon steels, alloy steels, tool steels, and stainless steel. Not recommended on materials above 35 Rc.

FEATURES:

- Special design allows tap to cut more freely while generating less heat.
- Surface treatment helps keep cutting fluid on the surface of the tap to eliminate galling and surface welding chips.
- Provides excellent tool life and higher quality finished threads.

PENTA BLUE: Taps will provide longer life and better thread finish versus standard taps in material such as medium and high carbon steel (1030 - 1045 - 1060), low and medium carbon alloy steels (4320 - 6620 - 8625 - 4130 - 4150 - 4340) and annealed condition steels (300 & 400 series). When using materials above 30 Rc, we recommend using the straight flute tap with a blue diamond treatment.

MICRO 100™ CCMT Carbide Insert 80° Diamond

MICRO 100 is a space age, micro grain carbide of excellent quality. It is in a class of its own, resulting from the exclusive treating process. Micro grain carbide has superior rupture strength for exceptional machining versatility. It is also highly shock resistant, it will not chip or break under normal machining conditions and is unexcelled in interrupted cutting. It prolongs tool life in machining all hard stainless steels, and also efficiently performing in exotic metals.

ROYAL PRODUCTS Chuck Stop Sets

The Royal Chuck Stop provides a simple, consistent method for locating short parts in a 3-jaw lathe chuck by allowing short parts to project past the chuck jaws, providing clearance for facing operations.

FEATURES:

- Captive, web-shaped design eliminates the danger of using spacers or parallels that could come loose and be thrown from a spinning chuck. Three strong magnets further secure the stop to the chuck face.
- Setup time is greatly reduced - no need to bore soft jaws.
- Slot width can be easily enlarged for wider chuck jaws.
- Anodized finish provides good wear-resistance.

EXAIR® Cold Gun Aircoolant System™

Replace messy mist systems. Improve dry machining with clean, cold air!

The Cold Gun produces a stream of clean, cold air at 50°F (28°C) below supply air temperature. Operation is quiet and there are no moving parts to wear out. It will remove heat to prolong tool life and increase productivity on machining operations when liquid coolants cannot be used.

Gun is non-adjustable to prevent freeze-up during use. Cold airflow and temperature drop are factory set to optimize the gun's cooling capability.
